About Us!

HelloWorld Robotics designs and builds autonomous delivery network and infrastructure with self-driving robots to provide a smarter, cheaper and safer last mile delivery solution. We also develop Lidar-based L4 autonomous driving with cost-effective & efficient customized solutions.

HelloWorld Robotics was founded in 2018 as a solo project before being incorporated in the early 2020.

HelloWorld Robotics

**Making Deliveries Smarter,
Cheaper & Safer!**

Our Services

Home-grown cost-effective mobile robotics technologies and solutions for outdoor & indoor applications

Full Hardware & Software system Integration for self-driving vehicles & mobile robotic design

Industrial Product & Mechanical Designs for prototyping & production

Plug & Play Autonomous self-driving Hardware components & Software modules for enterprise B2B2C solutions

Our Vision

To Make Things Move Autonomously

Our Mission

To Build the No.1 Autonomous Delivery Infrastructure & Network
